

Quality Assurance

100% copper rotor
100% pure electrolyte triple coated wire winding
LTB - 4 & 5 grade bearing & bush
High stage carbon signment thrust bearing
Fabricated ss impeller
SS - 410 grade stainless steel shaft with
INE grinding & balancing
SS 304 grade motor body
CRNO stamping
Fully computerised tested pumps

MANUFACTURERS & EXPORTERS

High head & High efficiency

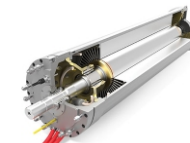

Lower power consumption

Noiseless operation

Special thrust bearing design

Stainless steel jacket

Easily rewindable

Manufactured by

LODI STEEL (I) PVT. LTD

T.T.C. Industrial area,
New Mumbai - 01, INDIA

Pure Water For Life

An ISO Certified Company

Sandus pump's is one the top-notch manufacturer's of stainless steel submersible pumps & motors. Our focus is to identify & provide a wide range of products for the water supply & liquid transfer applications with high duty points from 1 to 120 m³/h manufactured distinctively for individuals with varied technical skills.

MANUFACTURING

sandus pumps has remarkably developed as a key player to serve its clients in various countries as a multi-national supplier since 1995. We have not only created a niche demand around the world for our cutting edge products but also achieved the global requirements in terms of design and manufacturing for our stainless steel submersible pumps and motors. These high end products are created by seeking global solutions to fortify economics of scale in production which eventually has resulted into higher quality, low life cost and superior cost effectiveness. The fundamental notion behind the manufacturing facility is that, it is equipped with extensive capital equipments and machinery needed to minimize manufacturing costs as well as maintaining quality of the higher standards. Sandus exhibits heavy investment in the state-of-art manufacturing.

CUSTOMER SATISFACTION

In today's situation, the customer has multiple alternatives to choose: out of which sundus pumps has been a habitual and favoured company with an outstanding evidence for customer satisfaction. we believe in the phrase 'customer is the King' and hence our core proposition is to provide the customers with products and services of top-grade quality at an economical price.

LOW INSTALLATION COST

stainless steel implies light weight and self balanced hydraulic parts which safeguards higher efficiency with a comparatively small motor and corrosion resistant which means it provides prolonged running of the pump in spite of non-stop usage. We also provide cost-effective prices by matching the cost of a modern stainless steel pumps to the price of major over-haul expenses of a traditional cast iron or plastic pump.
